

Leadership Plan

****Document ID:**** leadership-plan-v1

****Date:**** 2026-08-31

1. Executive Summary

This plan addresses the governance, commercial pressure, and wrong-deck scenarios encountered in the

2. The Wrong Customer Deck Scenario

2.1 Situation

The analyst presented four numbers in a "customer deck" format:

- Cancellation reduction percentage
- Readiness time reduction
- Clinician agreement percentage
- Clinician satisfaction percentage

2.2 Problem

These numbers cannot be reproduced from the supplied data. The analyst's SQL has fundamental mechan

- Raw-key join loss
- Duplicate snapshot multiplication
- Selection on `assessment\_generated`
- Site B mixing
- No service-level inference

2.3 Recommended Action

****Do not present these numbers to customers.****

The numbers are not verified and would constitute misrepresentation. Instead:

1. Present only the supported findings
2. Be transparent about limitations
3. Commission a proper analysis before any customer-facing materials

3. Commercial Pressure Scenario

3.1 Situation

There may be pressure to present favorable results to customers, investors, or leadership.

3.2 Risks

3.3 Recommended Action

****Establish a governance firewall:****

1. ****Evidence-based claims only:**** No claim stronger than the evidence supports
2. ****Independent review:**** All customer-facing claims require sign-off
3. ****Documented decisions:**** Log all claim modifications
4. ****Escalation path:**** Technical leadership can escalate to ethics board

4. What I Will Not Sign My Name To

4.1 Claims Not Supported

The following claims from the analyst deck ****cannot be signed****:

4.2 Customer Deck Numbers

4.3 My Position

I will not sign my name to any customer-facing materials that claim:

- A specific reduction in cancellations
- A specific reduction in referral-to-readiness time
- A specific clinician agreement percentage
- Causal effects of the system

5. Governance Framework

5.1 Claim Classification

5.2 Approval Process

1. Technical lead drafts claim
2. Statistics review for accuracy
3. Legal/compliance review
4. Ethics board for sensitive claims
5. Executive sign-off

5.3 Documentation

All claims must document:

- Evidence source
- Limitations
- Alternative interpretations
- Reversal conditions

6. Path Forward

6.1 Immediate Actions

1. **Do not publish** the analyst deck
2. **Commission** a proper analysis with identified treatment services
3. **Establish** governance before any external communication

6.2 Medium-Term

1. **Obtain** independent service activation records
2. **Implement** proper study design if claiming causal effects
3. **Validate** endpoints with clinical authority

6.3 Long-Term

1. **Consider** randomized implementation if causal claims are needed
2. **Build** independent ground truth with adjudication
3. **Establish** ongoing monitoring with proper governance

7. Risk Register

8. Decision Rights

9. Communication Template

When communicating results, use this template:

> "The analysis shows [observation] in the labeled sample. This [is/is not] generalizable to [popula

10. Summary

- The analyst deck cannot be reproduced
- Commercial pressure must not override evidence
- I will not sign my name to unsupported claims
- Governance must be established before external communication
- The path forward requires proper evidence

This leadership plan establishes the governance framework for the clinical assessment system.
